

TRUE COLOR. TRUE QUALITY. TRUE VALUE.

TrueVIS

The new **SG series** printer/cutters

 Roland

Stunning Quality and Outstanding Results

Everything about the way TrueVIS printers produce images has been perfected. With the SG series, two FlexFire printheads fire precision droplets in 3 sizes and a wide print swath. This enables every drop of ink to fall exactly where it is intended, delivering beautiful images and uniform colors at production speeds.

Print and Contour Cut Your Way to More Profit

The TrueVIS SG uses Roland DG's most advanced integrated print/cut technology to date. Featuring a newly-designed cut carriage and blade holder, with increased downforce and accuracy, you can work with more media and discover more profit opportunities. The SG series gives you the power of integrated printing and contour cutting for an incredible price.

Smart Tech, Amazing Usability

In addition to a built-in control panel, a new Roland DG Mobile Panel enables you to manage the functions of the SG printer/cutter remotely using a smartphone or tablet with a Bluetooth connection. This smart and convenient new feature allows you to receive status updates as well as manage production, test printing, and cleaning functions while working in remote range of your machine.

Ink that Lowers Costs while Raising Quality

Supplied in 500ml pouches, and available in CMYK, inks for the TrueVIS SG series slide into a hidden ink bay with reusable cartridges for clean use with less waste.

TrueVIS INK delivers a wider color gamut and meets strict environmental standards with a GREENGUARD Gold certification for indoor air quality.

Whether you're just starting out or wanting to expand production, new TrueVIS SG series printer/cutters offer the quality and versatility you need. TrueVIS ushers in a new era of extreme color quality, integrated printing and contour cutting, plus high-tech ease-of-use. The SG delivers it all at an unbeatable value.

Experience Extreme TrueVIS Color

TrueVIS Color, achieved through the precision combination of Roland DG's FlexFire printheads and TrueVIS INK, results in amazingly vibrant colors and stunning details that blow the competition away.
